

// INTERNATIONAL CONFERENCE ON

The German Labor Market in a Globalized World: Trade, Technology, and Demographics

24 – 25 June 2022 | ZEW Mannheim, Germany

The conference focuses on technology, trade, and demographic changes and the ways they interact with employment, wages, and participation in the labor market, with a particular emphasis on the role of institutions and on labor markets during the COVID-19 crisis. Understanding these relationships is key in assessing the performance of the labor market and for the design of effective labor market policies.

We invite empirical and theoretical contributions on these topics from all areas of economics and sociology with a focus on labor, education, health, or human resource management.

The conference will be held in-person. It is sponsored by the German Research Foundation (DFG) as part of the Priority Program 1764 “The German Labor Market in a Globalized World” and will also mark the end of the program.

KEYNOTE SPEAKERS

- Eve Caroli (*Université Paris Dauphine*)
- Christian Dustmann (*University College London, CReAM, IAB*)
- Klarita Gërkhani (*European University Institute, Florence*)
- Albrecht Glitz (*Universitat Pompeu Fabra, Barcelona*)
