

CALL FOR PAPERS

// 7TH (ONLINE) WORKSHOP ON

Experimental Economics for the Environment

31 March – 1 April 2022 | Online

We are pleased to announce the 7th (online) Workshop on Experimental Economics for the Environment **from 31 March to 1 April 2022** (a half-day programme each day). The workshop will take place fully online. The keynote speaker for this event is Professor **Michael K. Price** (University of Alabama, Australian National University and NBER).

We are building a programme that focuses on discussion, interaction, and feedback to promote the contribution of experiments to environmental economics and policy. Priority will be given to earlier stage work by early career researchers (PhD students/postdocs), but submissions of projects at all stages are welcome. Attendance is open and free to all.

The deadline for submission of extended abstracts is **Friday 25 February 2022** and authors will be notified of acceptance of their contributions by Friday 4 March. Please indicate in your submission the stage of your work (experimental protocol, preliminary results or working paper) and whether you qualify as an early career researcher.

Please also indicate if you would like to participate in a **virtual blind coffee break**. We will match researchers to meet individually or in small groups in a coffee break to facilitate exchange and networking in an online format. Priority will be given to matching junior and senior researchers.

PAPER SUBMISSION

To submit an abstract, please fill out the following [form](#).

We are looking forward to seeing you!
