Special Questions: Inflation, its causes, and monetary policy

Due to the increase of inflation during the last months we would like to shed more light on the future development of inflation in the euro area and on the main factors which are currently affecting inflation. Please share your insights with us.

1a. Point forecast of the **annual inflation rate in the euro area**

(annual average change of the HICP, in percent):

Jahr	2022	2023	2024
Prognose	%	%	%

1b. How likely are specific future realizations of inflation? Please give us your assessments for the annual average inflation rate in the euro area:

...The sum of the probabilities should add up to 100 for every line.

	Below 1 percent	Between 1 and 2 percent	Between 2 and 3 percent	Above 3 percent	Σ	Don't know.
2022	_____ %	_____ %	_____ %	_____ %	100%	[]
2023	_____ %	_____ %	_____ %	_____ %	100%	[]
2024	_____ %	_____ %	_____ %	_____ %	100%	[]

2. What are the main factors leading you to change your inflation forecasts for the euro area (in comparison to your forecasts as of February 2022). (+) means increase in inflation forecast, (-) means decrease in inflation forecast.

For the years 2022, 2023, and 2024:
